### **High Risk of Rip Currents in Effect through Friday; Inexperienced Swimmers Advised to Stay Out of the Water**

The National Weather Service (NWS) Guam Weather Forecast Office advised a **high risk of rip currents** is in effect for Guam, Rota, Tinian, and Saipan from Monday evening through Friday afternoon. Dangerous rip currents are expected for east facing reefs of the Marianas.

**Inexperienced swimmers should remain out of the water due to dangerous rip currents.**

Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid dangerous rip currents, especially east facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
